Few Recent Google Reviews

Hi, my self lucky and I have done my certification in Data Analytics / Data Science from SLA consultant India. I really enjoyed my experience there, the best thing is faculties are very responsible for the students and I got my best learning over there.

I'm thankful to all the teachers and SLA team

I joined Data Analyst course at SLA Consultant and I am very satisfied. Learning from Mr Gupta Sir at SLA Institute was very impressive and got to learn many new things from him. The course structure was systematic, and the job istance added value. Overall it was a great experience with them.!!!!.

SLA Data Analyst has excellent faculty and very supportive stuffs. Sir, having relevant industry knowledge, is proficient in advance excel and other modules. It is a fantastic journey with them and I can recommend anyone who wants to start his/her journey towards data driven new world.

I have completed my Business Analytics course from SLA. Covering all the modules required to be an Analyst. The teachers are good with a good command over the subject taught by them. The management also helps in solving any doubts and with proper placement help.

SLA is indeed an excellent institution where you can obtain certifications in various courses, just as I did in Data Analytics/Science. It not only equips you with practical knowledge but also enhances your chances of securing a position in a reputable company. Thanks to SLA Consultants, I recently received a job offer. Joining SLA can truly open doors for you, and it's definitely a worthwhile investment.
